Contents Volume 5 (1993)

No. 1, January 1993 (Spinal Cord Neuroplasticity Special Issue)

Foreword vii

First Session – Development 1
Perspectives on the autocrine and paracrine functions of *trans*-activating factors
A. Prochiantz, A. Joliot and M. Volovitch (France) 3
The development and plasticity of peripheral and central connections of primary sensory neurons
M. Fitzgerald (UK) 8
Hox genes: a molecular code for patterning regional diversity in the nervous system and branchial structures
R. Krumlauf, P. Hunt, M.H. Sham, J. Whiting, S. Nonchev, H. Marshall, A. Graham, N. Papalopulu, M. Cook, E. Boncinelli and D. Wilkinson (UK, Italy) 10

Second Session – Factors Controlling Neural Growth 13
Neurotrophic factors in development and plasticity of spinal neurons
C. E. Henderson, E. Bloch-Gallego, W. Camu, A. Gouin and C. Mettling (France) 15
Molecular control of neuronal survival
Y.A. Barde (Germany) 29
The nerve growth factor family of neurotrophic factors
C.F. Ibanez and H. Persson (Sweden) 30
Myelin associated neurite growth inhibitors ni-35/ni-250
L. Schnell and M.E. Schwab (Switzerland) 32

Third Session – Afferent Systems 35
Plasticity in the spinal cord: the dorsal root connection
M. Murray (USA) 37
Regulation of levels of SP and CGRP in dorsal root ganglia and dorsal horn after neonatal sciatic nerve lesion
F. Nothias, A. Tessler and M. Murray 46
Neurotransmitter phenotype plasticity in adult dorsal root ganglia neurons
G. Moonen, P. Delree, D. Martin, C. Sadzot-Delvaux and J. Schoenen (Belgium) 48
Differential patterns of immediate early gene expression following sensory stimulation or nerve damage
C. De Felipe, R. Jenkins, R. O'Shea, S. Williams and S. Hunt (UK) 49
Factors controlling the expression of gap-43 in dorsal root ganglia cells: implications for plasticity and growth of central terminals
C.J. Woolf (UK) 51
The use of a highly selective opioid μ ligand to gauge the plasticity of small caliber primary afferent fibers that project to the superficial layers of the rat dorsal horn
M.C. Lombard, D. Besse and J.M. Besson (France) 53

Fourth Session – Cell Biology of Regeneration 57
Dynamic changes in motoneurons during regeneration
G.W. Kreutzberg (FRG) 59
Development of motoneurons in spinal transplants
J. Cadusseau, F. Nothias, A. Alanbari and M. Peschanski (France) 61

Transplant mediated mechanisms of locomotor recovery
A. Tessler, M.E. Goldberger, B.T. Himes, D.R. Howland, Y. Itoh and M.J. Pinter (USA) 64

Fifth Session – Functional Recovery 67
Grafts and functional recuperation
M. Goldberger, M. Murray and A. Tessler (USA) 69
Anatomical and behavioral outcome after spinal cord contusion injury produced by a displacement controlled impact device
J.C. Bresnahan, D.L. Behrmann and M.S. Beattie (USA) 76
Plasticity in sacral spinal cord reflex circuits
M.S. Beattie, J.C. Bresnahan and M.G. Leedy (USA) 77
Changes in lower urinary tract function following spinal cord injury
M.N. Kruse and W.C. de Groat (USA) 79
The effects of locomotor training in spinal cord injured subjects: a preliminary study
H. Barbeau, M. Danakas and B. Arsenault (Canada) 81

Final Round Table 85
Neuroplasticity as a basis for therapeutics in spinal cord injuries and diseases
M. Peschanski, N. Le Forestier and S. Rapisardi 87

Comments 99
B. Bregman
H. Barbeau
G.W. Kreutzberg
G. Moonen
W. De Groat

No. 2, March 1993

Announcement from the Publisher iii

Research Reports
Axonal regeneration after peripheral nerve grafting and fibrin–fibronectin-containing matrix implantation on the injured septohippocampal pathway of the adult rat: a light and electron microscopic study
B. Knoops, C. Ponsar, I. Hubert and P. van den Bosch de Aguilar (Belgium) 103
Characteristics of the vibratory reflex in humans with reduced suprasegmental influence due to spinal cord injury
A.M. Sherwood, M.R. Dimitrijevic, T. Bacia and W.B. McKay (USA, Poland) 119
The effect of a short-course treatment with FK506 on the survivability of rat-to-mouse cross-species neural graft
K. Sakai, Y. Yoshimoto and I. Date (Japan) 131
Functional consequences of transplantation of frontal neocortex vary with age of donor tissue and behavioral task
B. Fantie and B. Kolb (Canada) 141

Short Communications
Effect of highly concentrated gels of sodium hyaluronate on early phases of regeneration in the transected and tubulized rat sciatic nerve
A. Tona and G. Perides (USA, Italy) 151
GABA-ergic component of rat embryonic ventral mesencephalic grafts: an in-vitro study
J.C.V.M. Copray, A.J.P.E. Vincent, W. van Roon, R. Tomasini and M.J. Staal (The Netherlands) 155

Abstracts Selected from Excerpta Medica's EMBASE 161

No. 3, May 1993

Announcement from the Publisher iii

Research Reports

Delayed application of direct current electric fields in experimental spinal cord injuries
R.B. Borgens, M.E.M. Metcalf and A.R. Blight (USA) 173

Nerve regeneration is improved by insulin-like growth factor I (IGF-I) and basic fibroblast growth factor (bFGF)
J. Vergara, L. Medina, J. Maulén, N.C. Inestrosa and J. Alvarez (Chile) 181

Muscle coordination in hindlimbs of mice after bilateral nerve regeneration
A. Kreischer, D. Kleinebeckel and F.W. Klußmann (Germany) 191

Repair of the transected rat sciatic nerve: matrix formation within implanted silicone tubes
Q. Zhao, L.B. Dahlin, M. Kanje and G. Lundborg (Sweden) 197

Improvement of passive avoidance task after grafting of fetal striatal cell suspensions in ischemic striatum in the rat
K. Koide, T. Hashitani, N. Aihara, H. Mabe and H. Nishino (Japan) 205

Persisting axonal degeneration in the hippocampus after transection of the fimbria-fornix
R. Miettinen, H. Lahtinen, P.J. Riekkinen, T.F. Freund, M. Hsu, Z. Horváth and G. Buzsáki (Finland, Hungary, USA) 215

The regeneration of axons through normal and reversed peripheral nerve grafts
A.D. Ansselin and D.F. Davey (Australia) 225

Abstracts Selected from Excerpta Medica's EMBASE 241

No. 4, July 1993

Announcement from the Publisher iii

Research Reports

The distribution of C-Fos protein immunolabeled cells in the spinal cord of the rat after electrical and noxious thermal stimulation following sciatic nerve crush, or transection and repair
J. Hongpaisan and C. Molander (Sweden) 249

Septal grafts improve acquisition of an operant timing task after fimbria-fornix lesions in rats: Role of the interval between lesion and transplantation surgeries
S.B. Dunnett, A.T. Wareham and E.M. Torres (UK) 263

Sprout formation at nodes of Ranvier of crush-injured peripheral nerves
M. Tomatsuri, S. Okajima and C. Ide (Japan) 275

Reinstatement of motor deficits in recovered brain-injured animals: the role of cerebellar norepinephrine
M.G. Boyeson, K.A. Krobert, P.J. Scherer and C.M. Grade (USA) 283

Ventral root avulsion versus transection at the cervical 7 level of the cat spinal cord
C.F.E. Hoffmann, E. Marani, A.B. Oestreicher and R.T.W.M. Thomeer (The Netherlands) 291

Book Review 303

No. 5/6, September 1993

Announcement from the Publisher iii

Research Reports

Effects of applied electric fields on clinical cases of complete paraplegia in dogs
R.B. Borgens, J.P. Toombs, A.R. Blight, M.E. McGinnis, M.S. Bauer, W.R. Widmer and J.R. Cook Jr. (USA) 305

Comparison of the Semmes–Weinstein monofilaments with the Pressure-Specifying Sensory Device
E.S. Dellon, S. Crone, R. Mouery and A.L. Dellon (USA) 323

Pharmacological manipulation of the NMDA receptor differentially protects from systemic kainic acid neuropathology: evaluation through ornithine decarboxylase induction, morphology and GFAP immunohistochemistry
T. Guarnieri, M. Virgili, L. Villani, F. Facchinetti, A. Contestabile and P. Migani (Italy) 327

Visualization of outgrowing axons of grafted neurons by anterograde labelling with *Phaseolus vulgaris* leucoagglutinin in the motor cortex of the rat
V.V. Senatorov, C. Nyakas and Z. Fulop (Hungary, Russia) 337

Effects of microglia-derived cytokines on astrocyte proliferation
A. Suzumura, M. Sawada, K. Mokuno, K. Kato, T. Marunouchi and H. Yamamoto (Japan) 347

Synthetic nerve graft containing collagen and synthetic Schwann cells inproves functional, electrophysiological, and histological parameters of peripheral nerve regeneration
R. Keeley, T. Atagi, E. Sabelman, J. Padilla, P. Kadlcik, J. Agras, L. Eng, T.-W. Wiedman, K. Nguyen, A. Sudekum and J. Rosen (USA) 353

Short Communications

Amantadine and ketamine-induced improvement of motor coordination in lurcher mutant mice
R. Lalonde, C.C. Joyal, J.-M. Guastavino, C. Côté and M.I. Botez (Canada, France) 367

Acute unilateral sensorimotor cortex injury in the rat blocks d-amphetamine induced norepinephrine release in cerebellum
L.B. Goldstein and V. MacMillan (USA, Canada) 371

Abstracts Selected from Excerpta Medica's EMBASE 377

Contents Volume 5 387
